Dear Sir/Madam,

This is in reference to the position for a Meteorologist advertised on your website. I am very interested in this position and believe that I have the relevant education and employment background.

I have a BS and MS (with dissertation) in Meteorology from North Carolina State University. I have a strong background in theoretical and operational aspects of weather forecasting. I am very proficient in statistical, computing, and numerical methods. I have extensive experience in programming and scripting languages (e.g., Fortran, Python, Perl, JavaScript, HTML, LaTeX, csh) and in running complex numerical weather prediction models (Weather Research and Forecasting - WRF model). I am also comfortable with a variety of operating systems (UNIX/Linux, Mac OS, Windows) and analysis and visualization software (GEMPAK, GrADS, ArcGIS).

Please find attached my resume, which documents my educational and professional experience. I look forward to hearing from you.

Thank you for your consideration.

Sincerely,

Steven Harville
